Hydrocarbon Processing®

ANNUAL EDITORIAL INDEX 2000

VOLUME 79, Nos. 1–12

A

ABSORPTION

Gas Processes 2000 ..... Apr. 55
EU environmental laws impact fuels' requirements ..... May 51
Use an integrated two-tower process to separate transmix ..... May 85
Refining Processes 2000 ..... Nov. 85

ACID GASES

Reduce methanol manufacturing costs ..... Mar. 116-C
Gas Processes 2000 ..... Apr. 55
What should an owner/operator know when choosing an SMR/PSA ..... May 39
Optimize sulfur recovery operations with advanced control ..... Jul. 43
Control FCC flue-gas emissions ..... Jul. 55
What are the options to control VOC emissions? ..... Aug. 85
Refining Processes 2000 ..... Nov. 85

ACIDS/SALTS

Optimize alkylate production for clean fuels ..... May 63
Refining Processes 2000 ..... Nov. 85

ADSORPTION

Refining Processes 2000 ..... Nov. 85
Hydrogen—what are the costs? ..... Dec. 42

ALCOHOLS

Push syngas production limits ..... Mar. 100-C
Reduce methanol manufacturing costs ..... Mar. 116-C
Gas Processes 2000 ..... Apr. 55
What are the options to control VOC emissions? ..... Aug. 85
Refining Processes 2000 ..... Nov. 85

ALDEHYDES

Refining Processes 2000 ..... Nov. 85

ALKANES

Optimize alkylate production for clean fuels ..... May 63
Refining Processes 2000 ..... Nov. 85

ALKYLATION

Optimize alkylate production for clean fuels ..... May 63
Revamped FCC debutanizer yields flexibility with more capacity ..... Aug. 79
Improve catalyst removal methods ..... Oct. 39
Refining Processes 2000 ..... Nov. 85

AMINES

Gas Processes 2000 ..... Apr. 55
What are the options to control VOC emissions? ..... Aug. 85
Refining Processes 2000 ..... Nov. 85

ANTIKNOCK RATING

Refining Processes 2000 ..... Nov. 85

AROMATICS

Consider energy-conserving methods to improve the SM process ..... Mar. 79
Gas Processes 2000 ..... Apr. 55
What are the options to control VOC emissions? ..... Aug. 85
Refining Processes 2000 ..... Nov. 85

B

BOILING POINT

Gas Processes 2000 ..... Apr. 55

C

CATALYSTS

Use monitoring programs to improve ammonia plant uptime ..... Feb. 75
Reclaim precious metals from spent catalysts with zero discharge ..... Mar. 100-M
Gas Processes 2000 ..... Apr. 55
What should an owner/operator know when choosing an SMR/PSA ..... May 39
Optimize alkylate production for clean fuels ..... May 63
Are spent hydrocracking catalysts listed hazardous wastes? ..... Jul. 49
Control FCC flue-gas emissions ..... Jul. 55
What are the options to control VOC emissions? ..... Aug. 85
Improve catalyst removal methods ..... Oct. 39
Refining Processes 2000 ..... Nov. 85

CATALYTIC CRACKING

EU environmental laws impact fuels' requirements ..... May 51

CAUSTIC

Control FCC flue-gas emissions ..... Jul. 55

CETANE RATING

Refining Processes 2000 ..... Nov. 85

CHLORINATION

Gas Processes 2000 ..... Apr. 55
What are the options to control VOC emissions? ..... Aug. 85

COKING

Refining Processes 2000 ..... Nov. 85
Applied artificial intelligence for delayed coking ..... Nov. 144-A

COMPRESSORS

Prepare machinery repair specifications ..... Jan. 39
Quality machinery installation doesn't have to cost more ..... Jan. 47
Reciprocating compressor condition monitoring ..... Feb. 59
Understand dry gas seals ..... Feb. 85
Solve your hydrocracker compressor problems ..... Aug. 39
Consider variable-speed, motor-driven compressors in refrigeration unit ..... Aug. 61
Apply mechanical reliability principles to turbomachinery design ..... Oct. 43
Flow-induced noise and vibration in turbo-compressors and piping systems ..... Oct. 65
Optimize gas turbine-driven centrifugal compressors ..... Nov. 61
Reduce compressed air costs ..... Dec. 57

COMPUTERS

Limitations of model predictive controllers ..... Jan. 83
Consider using 'soft analyzers' to improve SRU control ..... Jan. 101
Managing global projects with virtual teams ..... Jan. 112-C
Parametric versus nonparametric models in MPC process identification ..... Feb. 65
Consider energy-conserving methods to improve the SM process ..... Mar. 79
Outlook for e-business in the chemical industry ..... Mar. 85
Improve nonlinear soft sensing modeling by combining multiple models ..... Apr. 108
Enterprise agility: the impact of e-commerce on the hydrocarbon marketplace ..... May 61
Ethernet will transform fieldbus ..... Jun. F-7
Consider modeling tools to revamp existing process units ..... Jun. 57
Distinguishing online benefits from those of advanced controls ..... Jun. 69
Ethylene plant closed-loop optimization ..... Jun. 81
An integrated engineering toolkit—achieving optimum value ..... Jun. 84-C
PROFIBUS: today and tomorrow ..... Jun. F-11
HSE: a cost-effective, high-speed automation solution ..... Jun. F-15
Fieldbus's manufacturing and process capabilities improve thermoplastic elastomer plant control ..... Jun. F-19
Fieldbus controls propylene oxide plant ..... Jun. F-22
FIELDBUS TECHNOLOGY ..... Jun. 116
Safety instrumented systems design: valuable lessons learned ..... Aug. 84-C
Modern advanced control pays back rapidly ..... Sep. 47
Implementing a refinery information system ..... Sep. 57
Challenges in control room design ..... Sep. 65
Economics of business process integration and automation ..... Sep. 75
Automated steady-state identification in multivariable systems ..... Sep. 79

Industrial applications of safety information management systems ..... Sep. 84-A
Hydrocracker advanced control improves profitability ..... Oct. 85
Improve high-pressure polyethylene reactor control ..... Nov. 55
Control level under fouling conditions ..... Nov. 71
Applied artificial intelligence for delayed coking ..... Nov. 144-A

CONSTRUCTION

Implement a lessons learned process that works ..... Jan. 97
Lessons taught the teacher ..... Feb. 38
Alliance contract sets standards for teamwork ..... Feb. 47
HPI CONSTRUCTION BOXSCORE UPDATE ..... Feb. 101
Improve startup of an olefins complex ..... Jun. 37
HPI CONSTRUCTION BOXSCORE ..... Jun. 101
Improved project definition ensures value-added performance—Part 1 ..... Aug. 95
Improved project definition ensures value-added performance—Part 2 ..... Sep. 99
HPI CONSTRUCTION BOXSCORE ..... Oct. Sup.
Capital cost estimating ..... Oct. 93
Systems approach for small capital projects ..... Dec. 73

CONTRACTS/AGREEMENTS

Alliance contract sets standards for teamwork ..... Feb. 47

CORROSION

Push syngas production limits ..... Mar. 100-C
Gas Processes 2000 ..... Apr. 55
Revamping crude unit increases reliability and operability ..... Jun. 45
Eliminate air preheater corrosion ..... Jul. 83
Material selection and corrosion control ..... Oct. 76

COSTS

Managing global projects with virtual teams ..... Jan. 112-C
Project management for process control systems ..... Feb. 43
Alliance contract sets standards for teamwork ..... Feb. 47
Business tools for technology tranfer ..... Feb. 84-B
HPI CONSTRUCTION BOXSCORE UPDATE ..... Feb. 101
A view of ACHEMA 2000 ..... Mar. 45
The petrochemical/chemical industry, by country ..... Mar. 47
What are the opportunities for polystyrene operators? ..... Mar. 97
Reduce methanol manufacturing costs ..... Mar. 116-C
Gas Processes 2000 ..... Apr. 55
EU environmental laws impact fuels' requirements ..... May 51
Process technology: the key to boosting downstream value ..... May 84-B
An integrated engineering toolkit—achieving optimum value ..... Jun. 84-C
Fieldbus's manufacturing and process capabilities improve thermoplastic elastomer plant control ..... Jun. 19-F
HPI CONSTRUCTION BOXSCORE ..... Jun. 101
Training today's process plant manager ..... Jun. 125
Cooling tower fill: the neglected moneymaker ..... Jul. 65
Ways to measure your HSE program ..... Jul. 84-B
Easy way to estimate control valve pressure drops ..... Aug. 45
Consider variable-speed, motor-driven compressors in refrigeration units ..... Aug. 61
Safety instrumented systems design: valuable lessons learned ..... Aug. 84-C
What are the options to control VOC emissions? ..... Aug. 85
Improved project definition ensures value-added performance—Part 1 ..... Aug. 95
Modern advanced control pays back rapidly ..... Sep. 47
Consider fieldbus for retrofits ..... Sep. 53
Industrial applications of safety information management systems ..... Sep. 84-A
The best machinery monitoring tool you can buy ..... Sep. 85
Improved project definition ensures value-added performance—Part 2 ..... Sep. 99
HPI CONSTRUCTION BOXSCORE ..... Oct. Sup.
What are process safety management audits telling operators? ..... Oct. 82
Hydrocracker advanced control improves profitability ..... Oct. 85
Capital cost estimating ..... Oct. 93
Evaluating troubleshooting skills ..... Oct. 100-C
Applied artificial intelligence for delayed coking ..... Nov. 144-A
Consider outsourcing energy supplies ..... Dec. 54
Reduce compressed air costs ..... Dec. 57
Systems approach for small capital projects ..... Dec. 73
How to buy flares ..... Dec. 76

CRACKING/CHEMICAL

Improve startup of an olefins complex ..... Jun. 37
Revamping crude unit increases reliability and operability ..... Jun. 45
Are spent hydrocracking catalysts listed hazardous wastes? ..... Jul. 49
Revamped FCC debutanizer yields flexibility with more capacity ..... Aug. 79
Refining Processes 2000 ..... Nov. 85
Hydrogen—what are the costs? ..... Dec. 42

CRUDE OILS

Revamping crude unit increases reliability and operability ..... Jun. 45
Consider modeling tools to revamp existing process units ..... Jun. 57

D

DEASPHALTING

Refining Processes 2000 ..... Nov. 85

DESULFURIZATION

Gas Processes 2000 ..... Apr. 55
Optimize sulfur recovery operations with advanced control ..... Jul. 43
Are spent hydrocracking catalysts listed hazardous wastes? ..... Jul. 49
Refining Processes 2000 ..... Nov. 85

DISTILLATION

Improve startup of an olefins complex ..... Jun. 37
Revamping crude unit increases reliability and operability ..... Jun. 45
Consider modeling tools to revamp existing process units ..... Jun. 57
Revamped FCC debutanizer yields flexibility with more capacity ..... Aug. 79
Prevent plugging in stripping columns ..... Sep. 95
Refining Processes 2000 ..... Nov. 85

DRYING

Gas Processes 2000 ..... Apr. 55

E

ENVIRONMENT

Consider using 'soft analyzers' to improve SRU control ..... Jan. 101
The petrochemical/chemical industry, by country ..... Mar. 47
Nontraditional R&D and process development ..... Apr. 120-B
What should an owner/operator know when choosing an SMR/PSA ..... May 39
EU environmental laws impact fuels' requirements ..... May 51
Secondary containment liners for tank farms: a new approach ..... May 81
Optimize sulfur recovery operations with advanced control ..... Jul. 43
Are spent hydrocracking catalysts listed hazardous wastes? ..... Jul. 49
Control FCC flue-gas emissions ..... Jul. 55
Ways to measure your HSE program ..... Jul. 84-B
What are the options to control VOC emissions? ..... Aug. 85
Refining Processes 2000 ..... Nov. 85

ESTERS

What are the options to control VOC emissions? ..... Aug. 85

ETHERS

Gas Processes 2000 ..... Apr. 55
Refining Processes 2000 ..... Nov. 85
Hydrogen—what are the costs? ..... Dec. 42

F

FLOW PROPERTIES

Use an integrated two-tower process to separate transmix ..... May 85
Solve your hydrocracker compressor problems ..... Aug. 39
Relationship between pressure drop and heat transfer coefficient ..... Aug. 65
Consider slotted orifice flow meters ..... Dec. 65

FORECASTING

The petrochemical/chemical industry, by country ..... Mar. 47

FUELS

EU environmental laws impact fuels' requirements ... May 51
Use an integrated two-tower process to separate transmix ... May 85
Revamping crude unit increases reliability and operability ... Jun. 45
Hydrocracker advanced control improves profitability ... Oct. 85

G

GLYCOLS

Gas Processes 2000 ... Mar. 55
Consider energy-conserving methods to improve the SM process ... Mar. 79
Optimize EO/EG operations ... Sep. 91

H

HEAT TRANSFER

Use monitoring programs to improve ammonia plant uptime ... Feb. 75
Gas Processes 2000 ... Mar. 55
Consider energy-conserving methods to improve the SM process ... Mar. 79
What are the opportunities for polystyrene operators? ... Mar. 97
Push syngas production limits ... Mar. 100-C
What should an owner/operator know when choosing an SMR/PSA ... May 39
Revamping crude unit increases reliability and operability ... Jun. 45
Consider modeling tools to revamp existing process units ... Jun. 57
Systematic procedure for reengineering process equipment ... Jun. 65
Optimize sulfur recovery operations with advanced control ... Jul. 43
Cooling tower fill: the neglected moneymaker ... Jul. 65
Fired heater rating ... Jul. 69
Eliminate air preheater corrosion ... Jul. 83
Relationship between pressure drop and heat transfer coefficient ... Aug. 65
What are the options to control VOC emissions? ... Aug. 85
Design consideration to prevent heat exchanger failure ... Nov. 66
Refining Processes 2000 ... Nov. 85
Hydrogen—what are the costs? ... Dec. 42
Improve condensate recovery systems ... Dec. 47

HYDROCRACKING

Are spent hydrocracking catalysts listed hazardous wastes? ... Jul. 49
Refining Processes 2000 ... Nov. 85

HYDROGEN

Gas Processes 2000 ... Mar. 55
Push syngas production limits ... Mar. 100-C
Reduce methanol manufacturing costs ... Mar. 116-C
What should an owner/operator know when choosing an SMR/PSA ... May 39
Hydrogen—what are the costs? ... Dec. 42

HYDROGENATION

Refining Processes 2000 ... Nov. 85

HYDROTREATING

Gas Processes 2000 ... Mar. 55
EU environmental laws impact fuels' requirements ... May 51
Are spent hydrocracking catalysts listed hazardous wastes? ... Jul. 49

I

INSTRUMENTATION

Limitations of model predictive controllers ... Jan. 83
Consider using 'soft analyzers' to improve SRU control ... Jan. 101
Reciprocating compressor condition monitoring ... Feb. 59
Parametric versus nonparametric models in MPC process identification ... Feb. 65
Controlling vessels and tanks ... Mar. 101
Effective machinery monitoring: getting the most for your investment ... Mar. 129
Use safety transmitters to reduce costs and improve reliability ... Apr. 45
Improve nonlinear soft sensing modeling by combining multiple models ... Apr. 108
What should an owner/operator know when choosing an SMR/PSA ... May 39
Use ATG for tank-based custody transfers ... May 77
Ethernet will transform fieldbus ... Jun. F-7
Consider modeling tools to revamp existing process units ... Jun. 57
Distinguishing online benefits from those of advanced controls ... Jun. 69
Ethylene plant closed-loop optimization ... Jun. 81
PROFIBUS: today and tomorrow ... Jun. F-11
HSE: a cost-effective, high-speed automation solution ... Jun. F-15
Fieldbus's manufacturing and process capabilities improve thermoplastic elastomer plant control ... Jun. F-19
Fieldbus controls propylene oxide plant ... Jun. F-22
FIELDBUS TECHNOLOGY ... Jun. 116
Producing product and change together ... Jul. 85
Easy way to estimate control valve pressure drops ... Aug. 45
Standardizing emerging metering and electronic technologies ... Aug. 51
Safety instrumented systems design: valuable lessons learned ... Aug. 84-C
Modern advanced control pays back rapidly ... Sep. 47
Consider fieldbus for retrofits ... Sep. 53
Implementing a refinery information system ... Sep. 57
Challenges in control room design ... Sep. 65
Economics of business process integration and automation ... Sep. 75
Automated steady-state identification in multivariable systems ... Sep. 79
Improve safety systems with redundant networks ... Oct. 59
Hydrocracker advanced control improves profitability ... Oct. 85
Improve high-pressure polyethylene reactor control ... Nov. 55
Control level under fouling conditions ... Nov. 71
Applied artificial intelligence for delayed coking ... Nov. 144-A
Consider slotted orifice flow meters ... Dec. 65

INTERNATIONAL TRADE

The petrochemical/chemical industry, by country ... Mar. 47
Outlook for e-business in the chemical industry ... Mar. 85

INVENTORIES

The petrochemical/chemical industry, by country ... Mar. 47
Secondary containment liners for tank farms: a new approach ... May 81
Use an integrated two-tower process to separate transmix ... May 85

ISOMERIZATION

Gas Processes 2000 ... Mar. 55
Refining Processes 2000 ... Nov. 85

K

KETONES

What are the options to control VOC emissions? ... Aug. 85
Refining Processes 2000 ... Nov. 85

L

LEGISLATION

A view of ACHEMA 2000 ... Mar. 45
A look at the new ISO 9000:2000 ... Apr. 113
Optimize sulfur recovery operations with advanced control ... Jul. 43
Are spent hydrocracking catalysts listed hazardous wastes? ... Jul. 49
What are the options to control VOC emissions? ... Aug. 85
Improve catalyst removal methods ... Oct. 39
What are process safety management audits telling operators? ... Oct. 82
Refining Processes 2000 ... Nov. 85

LIQUEFIED NATURAL GAS (LNG)

Gas Processes 2000 ... Mar. 55
Hydrogen—what are the costs? ... Dec. 42

LIQUEFIED PETROLEUM GAS (LPG)

Gas Processes 2000 ... Mar. 55

LOSS PREVENTION

Improve liquid/gas coalescer performance ... Jan. 89
Consider using 'soft analyzers' to improve SRU control ... Jan. 101

The petrochemical/chemical industry, by country ... Mar. 47
Reclaim precious metals from spent catalysts with zero discharge ... Mar. 100-M
Use safety transmitters to reduce costs and improve reliability ... Apr. 45
Optimize alkylate production for clean fuels ... May 63
Improve startup of an olefins complex ... Jun. 37
Control FCC flue-gas emissions ... Jul. 55
Ways to measure your HSE program ... Jul. 84-B
Revamped FCC debutanizer yields flexibility with more capacity ... Aug. 79
Safety instrumented systems design: valuable lessons learned ... Aug. 84-C
Industrial applications of safety information management systems ... Sep. 84-A
Improve catalyst removal methods ... Oct. 39
Improve safety systems with redundant networks ... Oct. 59
What are process safety management audits telling operators? ... Oct. 82
Evaluating troubleshooting skills ... Oct. 100-C
Improve condensate recovery systems ... Dec. 47
How to buy flares ... Dec. 76

LUBRICANTS

Refining Processes 2000 ... Nov. 85

M

MAINTENANCE

Prepare machinery repair specifications ... Jan. 39
Quality machinery installation doesn't have to cost more ... Jan. 47
Understand heavy-duty industrial gas turbines ... Jan. 55
Improve CPVC piping reliability ... Jan. 65
Guidelines aid troubleshooting ... Jan. 69
Overlooked ways to cut gas turbine refurbishment costs ... Jan. 79
Reciprocating compressor condition monitoring ... Feb. 59
Understand dry gas seals ... Feb. 85
Using and justifying systematic root-cause analysis ... Mar. 17
Analyzing gear failures ... Apr. 97
Solve your hydrocracker compressor problems ... Aug. 39
Benchmarking: a reliability driver ... Aug. 71
Revamped FCC debutanizer yields flexibility with more capacity ... Aug. 79
The best machinery monitoring tool you can buy ... Sep. 85
Apply mechanical reliability principles to turbomachinery design ... Oct. 43
Flow-induced noise and vibration in turbocompressors and piping costs ... Oct. 65
Material selection and corrosion control ... Oct. 76
Evaluating troubleshooting skills ... Oct. 100-C
Design consideration to prevent heat exchanger failure ... Nov. 66

MANAGEMENT

Implement a lessons learned process that works ... Jan. 97
Managing global projects with virtual teams ... Jan. 112-C
Lessons taught the teacher ... Feb. 38
Project management for process control systems ... Feb. 43
Alliance contract sets standards for teamwork ... Feb. 47
Business tools for technology tranfer ... Feb. 84-B
Outlook for e-business in the chemical industry ... Mar. 85
A look at the new ISO 9000:2000 ... Apr. 113
Nontraditional R&D and process development ... Apr. 120-B
Enterprise agility: the impact of e-commerce on the hydrocarbon marketplace ... May 61
Process technology: the key to boosting downstream value ... May 84-B
One hundred key management expressions ... May 103
Improve startup of an olefins complex ... Jun. 37
An integrated engineering toolkit—achieving optimum value ... Jun. 84-C
Training today's process plant manager ... Jun. 125
Ways to measure your HSE program ... Jul. 84-B
Producing product and change together ... Jul. 85
Improved project definition ensures value-added performance—Part 1 ... Aug. 95
Industrial applications of safety information management systems ... Sep. 84-A
Improved project definition ensures value-added performance—Part 2 ... Sep. 99
What are process safety management audits telling operators? ... Oct. 82
Evaluating troubleshooting skills ... Oct. 100-C
Applied artificial intelligence for delayed coking ... Nov. 144-A
Systems approach for small capital projects ... Dec. 73

METALS

Reclaim precious metals from spent catalysts with zero discharge ... Mar. 100-M
What should an owner/operator know when choosing an SMR/PSA ... May 39
Are spent hydrocracking catalysts listed hazardous wastes? ... Jul. 49

MOTORS

Understanding kinetic requirements of induction motors ... May 91
Consider variable-speed, motor-driven compressors in refrigeration units ... Aug. 61
Apply mechanical reliability principles to turbomachinery design ... Oct. 43

N

NAPHTHA

EU environmental laws impact fuels' requirements ... May 51
Improve startup of an olefins complex ... Jun. 37
Revamping crude unit increases reliability and operability ... Jun. 45
Hydrogen—what are the costs? ... Dec. 42

NAPHTHENIC ACIDS

Gas Processes 2000 ... Mar. 55

NATURAL GASES

Push syngas production limits ... Mar. 100-C
Reduce methanol manufacturing costs ... Mar. 116-C

NITROGEN AND ITS COMPOUNDS

Use monitoring programs to improve ammonia plant uptime ... Feb. 75
Gas Processes 2000 ... Mar. 55
Reduce methanol manufacturing costs ... Mar. 116-C

O

OLEFINS

Gas Processes 2000 ... Mar. 55
Consider energy-conserving methods to improve the SM process ... Mar. 79
Optimize alkylate production for clean fuels ... May 63
Improve startup of an olefins complex ... Jun. 37
Fieldbus controls propylene oxide plant ... Jun. F-22
Optimize EO/EG operations ... Sep. 91
Improve catalyst removal methods ... Oct. 39
Refining Processes 2000 ... Nov. 85

OXIDATION

Gas Processes 2000 ... Mar. 55

OXYGENATES

Optimize alkylate production for clean fuels ... May 63
Optimize EO/EG operations ... Sep. 91
Hydrogen—what are the costs? ... Dec. 42

P

PARTIAL OXIDATION

Gas Processes 2000 ... Mar. 55
What should an owner/operator know when choosing an SMR/PSA ... May 39

PIPING

Improve CPVC piping reliability ... Jan. 65
Improve liquid/gas coalescer performance ... Jan. 89
What should an owner/operator know when choosing an SMR/PSA ... May 39
Use an integrated two-tower process to separate transmix ... May 85
Improve startup of an olefins complex ... Jun. 37
Evaluate piping dynamic stresses ... Jun. 93
Easy way to estimate control valve pressure drops ... Aug. 45
Relationship between pressure drop and heat transfer coefficicent ... Aug. 65
Optimize EO/EG operations ... Sep. 91
Flow-induced noise and vibration in turbocompressors and piping systems ... Oct. 65

Improve condensate recovery systems ... Dec. 47

POLYMERIZATION

What are the opportunities for polystyrene operators? ... Mar. 97
Refining Processes 2000 ... Nov. 85

PRECIPITATION

Gas Processes 2000 ... Mar. 55

PUMPS

Quality machinery installation doesn't have to cost more ... Jan. 47

R

REFORMING

Gas Processes 2000 ... Mar. 55
Push syngas production limits ... Mar. 100-C
Reduce methanol manufacturing costs ... Mar. 116-C
What should an owner/operator know when choosing an SMR/PSA ... May 39
Refining Processes 2000 ... Nov. 85

REFRIGERATION

Gas Processes 2000 ... Mar. 55
Improve startup of an olefins complex ... Jun. 37

RESIDUES

Gas Processes 2000 ... Mar. 55
Refining Processes 2000 ... Nov. 85

ROTATING EQUIPMENT

Use monitoring programs to improve ammonia plant uptime ... Feb. 75
Effective machinery monitoring: getting the most for your investment ... Mar. 129
Analyzing gear failures ... Apr. 97
Improve startup of an olefins complex ... Jun. 37
Consider modeling tools to revamp existing process units ... Jun. 57
Improve steam turbine efficiency ... Jun. 85
The best machinery monitoring tool you can buy ... Sep. 85
Apply mechanical reliability principles to turbomachinery design ... Oct. 43
Optimize gas turbine-driven centrifugal compressors ... Nov. 61
Improve condensate recovery systems ... Dec. 47

S

SCHEDULING

Improved project definition ensures value-added performance—Part 1 ... Aug. 95
Improved project definition ensures value-added performance—Part 2 ... Sep. 99

SOFTWARE

Limitations of model predictive controllers ... Jan. 83
Managing global projects with virtual teams ... Jan. 112-C
Project management for process control systems ... Feb. 43
Improve nonlinear soft sensing modeling by combining multiple models ... Apr. 108

SOLVENT REFINING

Refining Processes 2000 ... Nov. 85

STACKS

Gas Processes 2000 ... Mar. 55
Optimize sulfur recovery operations with advanced control ... Jul. 43

STEAM

Improve steam turbine efficiency ... Jun. 85
Hydrogen—what are the costs? ... Dec. 42
Improve condensate recovery systems ... Dec. 47
Consider outsourcing energy supplies ... Dec. 54

SULFUR

Gas Processes 2000 ... Mar. 55
EU environmental laws impact fuels' requirements ... May 51
Optimize alkylate production for clean fuels ... May 63
Optimize sulfur recovery operations with advanced control ... Jul. 43
Refining Processes 2000 ... Nov. 85

SULFURIC ACID

Gas Processes 2000 ... Mar. 55

SYNTHESIS GAS

Push syngas production limits ... Mar. 100-C

T

THERMODYNAMICS

Gas Processes 2000 ... Mar. 55
Consider modeling tools to revamp existing process units ... Jun. 57

TRAINING

Lessons taught the teacher ... Feb. 38
The petrochemical/chemical industry, by country ... Mar. 47
Nontraditional R&D and process development ... Apr. 120-B
Process technology: the key to boosting downstream value ... May 84-B
Improve startup of an olefins complex ... Jun. 37
An integrated engineering toolkit—achieving optimum value ... Jun. 84-C
Training today's process plant manager ... Jun. 125
Ways to measure your HSE program ... Jul. 84-B
Industrial applications of safety information management systems ... Sep. 84-A
Evaluating troubleshooting skills ... Oct. 100-C
Applied artificial intelligence for delayed coking ... Nov. 144-A

TREATING

Gas Processes 2000 ... Mar. 55
Optimize sulfur recovery operations with advanced control ... Jul. 43
Improve catalyst removal methods ... Oct. 39
Refining Processes 2000 ... Nov. 85
Refining Processes 2000 ... Nov. 85

TURBINES

Understand heavy-duty industrial gas turbines ... Jan. 55
Overlooked ways to cut gas turbine refurbishment costs ... Jan. 79
Gas Processes 2000 ... Mar. 55
Improve steam turbine efficiency ... Jun. 85
Apply mechanical reliability principles to turbomachinery design ... Oct. 43
Consider outsourcing energy supplies ... Dec. 54

U

UTILITIES

Gas Processes 2000 ... Mar. 55
What should an owner/operator know when choosing an SMR/PSA ... May 39
Control FCC flue-gas emissions ... Jul. 55
Cooling tower fill: the neglected moneymaker ... Jul. 65
Hydrogen—what are the costs? ... Dec. 42
Improve condensate recovery systems ... Dec. 47
Consider outsourcing energy supplies ... Dec. 54
Reduce compressed air costs ... Dec. 57

V

VALVES

Evaluate piping dynamic stresses ... Jun. 93
Choosing a bellows seal valve for zero leakage ... Jul. 63
Easy way to estimate control valve pressure drops ... Aug. 45
Improve condensate recovery systems ... Dec. 47

VESSELS

Gas Processes 2000 ... Mar. 55
What are the opportunities for polystyrene operators? ... Mar. 97
Controlling vessels and tanks ... Mar. 101
What should an owner/operator know when choosing an SMR/PSA ... May 39
Improve startup of an olefins complex ... Jun. 37
Revamping crude unit increases reliability and operability ... Jun. 45
Consider modeling tools to revamp existing process units ... Jun. 57
Control FCC flue-gas emissions ... Jul. 55
Revamped FCC debutanizer yields flexibility with more capacity ... Aug. 79
Prevent plugging in stripping columns ... Sep. 95
Improve catalyst removal methods ... Oct. 39
Evaluating liquid distributors in hydroprocessing reactors ... Nov. 76

VISBREAKING

Refining Processes 2000 ... Nov. 85

W

WASTEWATER

Eliminate air preheater corrosion ... Jul. 83
